International Journal of

COMPUTER INTEGRATED MANUFACTURING

CONTENTS

Volume 2 (1989), Numbers 1–6

Taylor & Francis London • New York • Philadelphia

NUMBER 1 JANUARY–FEBRUARY 1989

Editorial 1

An interactive scheduler for production activity control
Sean Jackson and Jim Browne 2

An application of the sampling theorem to data collection in a computer integrated manufacturing environment
R. J. Schlesinger and V. B. Ballew 15

Optimum design of communication network for computer integrated manufacturing
Biman K. Ghosh 23

Design of a knowledge-based generic control protocol generator for automatic assembly operations
D. L. Kimbler and Cesar O. Malave 36

Development of an artificial intelligence interface for robotic assembly in a flexible manufacturing system
E. G. Mettala, D. B. Strong and P. J. Egbelu 48

Book reviews 59

NUMBER 2 MARCH–APRIL 1989

Guest Editorial 63

Issues in the design and implementation of a system architecture for computer integrated manufacturing
Albert Jones, Edward Barkmeyer and Wayne Davis 65

Configuration methods and tools for manufacturing systems integration
R. H. Weston, A. Hodgson, J. D. Gascoigne, C. M. Sumpter, A. Rui and I. Coutts 77

A reference model for production control
Udo Graefe and Vince Thomson 86

CIM-OSA: computer integrated manufacturing—open system architecture
Dirk Beeckman 94

A management and control architecture for factory-floor systems: from concept to reality
S. P. Moss 106

A reference model for computer integrated manufacturing from the viewpoint of industrial automation
CIM Reference Model Committee, Purdue University 114

Call for papers 128

NUMBER 3 MAY–JUNE 1989

Editorial 129

Expert-simulation of a tool-dispatcher for factory automation
G. M. Acaccia, F. Campolonghi, R. C. Michelini and R. M. Molfino 131

A catalytic implementation methodology for CIM
S. Smith and D. Tranfield 140

The generation of random families of parts for manufacturing systems simulation
D. M. Upton and M. M. Barash 148

A parser that converts a boundary representation into a features representation
T. R. Kramer 154

Management survey on justifying new manufacturing technologies
J. Meredith 164

The progress of a CIM programme in a multi-national company
R. J. Boaden and B. G. Dale 171

Book reviews 181

NUMBER 4 JULY–AUGUST 1989

Editorial 185

Group scheduling using group technology concepts
D. Ben-Arieh and M. Dror 186

Automated generation of NC part programs from a feature-based component description
W. R. Magill and A. J. McLeod 194

Qualitative Process Automation
S. R. LeClair and F. L. Abrams 205

National differences in the business environment for automated manufacturing
J. Baranson 212

Electronic data interchange for product structure data
A. H. Meijer 220

Syntactic models of manufacturing processing and control
D. J. Williams and D. M. Upton 229

Book reviews 238

NUMBER 5 SEPTEMBER–OCTOBER 1989

Editorial 241

Alternative approaches to sequencing robot moves for PCB assembly
E. G. Mettala and P. J. Egbelu 243

A part-feature recognition system for rotational parts—non-turning features
Rong-Kwei Li and Tai-Zen Hwang 257

Planning for just-in-time production
K. Chaharbaghi, B. L. Davis and S. C. Minett 268

Performance modelling and evaluation of flexible manufacturing systems using a semi-Markov approach
S. B. Ahmed, M. Alam and D. Gupta 275

Distributed manipulation environment—(a transputer-based distributed robotic system)
F. Naghdy and P. Strickland 281

CIM—a manufacturing paradigm
V. Thomson and U. Graefe 290

Book review 298

Call for papers 299

NUMBER 6 NOVEMBER–DECEMBER 1989

Editorial 301

A classification and measurement structure for manufacturing plants
G. D. M. Frizelle 303

BARBS: integrating simulation, optimization and knowledge-based techniques to identify and eliminate production bottlenecks
C. U. King and E. L. Fisher 317

Calculating investments for integrated manufacturing: looking at the overall costs and benefits
D. Boelzing and H. Schulz 329

A strategic integrated marketing and production planning model
B. Pourbabai 339

Knowledge-based configuration of industrial automation systems
B. R. Clarke 346

A review of scheduling rules in flexible manufacturing systems
Y. P. Gupta, M. C. Gupta and C. R. Bector 356

Book reviews 378

Index of authors (with titles) 380
